Under the auspices of:

## Welcome Message

Dear Friends & Colleagues,

It gives me great pleasure to invite you to our 5<sup>th</sup> annual event '11 Days of Facial Plastic Surgery', a set of 3 consecutive fresh frozen cadaveric dissection courses to be held from 4<sup>th</sup> to 14<sup>th</sup> November 2018.

The first course planned during this event is the '5th Singapore Advanced Rhinoplasty Fresh Frozen Cadaveric Dissection Course'. Over the last four years this very successful and well-received course has matured into a premium learning event for enthusiastic rhinoplasty surgeons keen to hone their surgical skills further. The course this year has been enhanced further by incorporating the feedback from the participants and faculty from previous courses. We have incorporated a complete section on management of ethnic noses with special emphasis on intricacies of Asian rhinoplasty.

The course comprises of two days of lectures and panel discussions covering the complete scope of surgical challenges encountered during rhinoplasty. Participants will learn useful tips on managing them safely, predictably and effectually. Structured panel discussions by our expert faculty will help delegates to consolidate their understanding of some of the common problems encountered during analysis, planning and execution of rhinoplasty. The delegates will learn techniques to restore both the form and function of the nose.

The next two days will be devoted to surgical dissection on highest quality fresh frozen cadaveric specimens to provide extensive hands-on training in a wide range of surgical techniques used in rhinoplasty. The surgical skills laboratory segment of the course will be limited to **10 Dissectors and 10 Assistants** to allow for intimate supervision by experienced faculty. A unique feature of our course is **1:1 Dissector to Cadaveric specimen ratio**. State of the art surgical instruments will be made available to the delegates. The participants will benefit from the wealth of experience offered by our outstanding international and national faculty.

Singapore is a lively city with many historical and modern architectural landmarks. It is a paradise for foodies and offers an abundance of experiences that will help you to have a memorable and enjoyable visit. Travel to Singapore is easy as it is well connected to major airports in the world.

We look forward to seeing you at '11 Days of Facial Plastic Surgery 2018'.

Course Chairman

Dr Sandeep Uppal PhD, FRCS (ORL-HNS)

Adj. Asst. Prof in Otolaryngology,  
National University of Singapore

Senior Consultant Otolaryngologist  
Trained in Facial Plastic Surgery,  
Khoo Teck Puat Hospital

## Programme at a Glance

### Day 1 & 2 Lectures & Panel Discussions

- » Surgical Anatomy of the Nose
- » Rhinoplasty: Preoperative Assessment
- » Perioperative Care of Rhinoplasty Patients
- » The Chin in Rhinoplasty
- » Cartilage Grafting in Rhinoplasty
- » Alloplastic Nasal Implants: When and Why?
- » Primary Rhinoplasty: Technical Pearls
- » Osteotomy: Principles, Techniques, Avoiding Complications
- » Nasal Hump Reduction
- » Management of Saddle Nose
- » Management of Crooked Nose
- » Middle Vault in Rhinoplasty
- » Management of Broad Nose
- » Tripod Principle for Nasal Tip Surgery
- » Suturing Techniques for Tip Modification
- » The Over Projected Tip: Analysis and Management
- » The Under Projected Tip: Analysis and Management
- » Customizing Rhinoplasty According to Skin Thickness
- » The Ptotic Tip
- » Over Rotated Tip
- » The Boxy Tip
- » Saddle Nose
- » Tension Nose
- » Managing Altered Alar Columellar Relationship
- » Alar Base Refinement
- » Short Nose: A Surgical Challenge
- » The Oriental Nose: Special Considerations
- » Rhinoplasty in Indian Patients
- » Rhinoplasty in Middle Eastern Patients
- » Complexities of Revision Rhinoplasty
- » Dorsal And Caudal Septal Deviation
- » Panel Discussion: Managing A Difficult Patient
- » Panel Discussion: Challenges in Tip Refinement
- » Panel Discussion: Secondary Rhinoplasty: Challenges and Pitfalls

### Day 3 & 4 Fresh Frozen Cadaveric Dissection

- » Conchal and Rib Cartilage Harvest
- » Delivery Approach
- » Endonasal Approach to the Nasal Dorsum
- » Silicone Nasal Implant
- » Silicone Chin Implant
- » External Approach: Raising the Skin and Soft Tissue Envelope
- » Dorsal Approach to Septum and Septal Cartilage Harvest
- » Component Hump Resection and Septal Cartilage Harvest
- » Spreader Flaps and Spreader/Extended Spreader Grafts
- » Septal Extension Graft and Columellar Strut
- » Suture Techniques for Tip Refinement
- » Cartilage Grafts to the Nasal Tip
- » Lateral Crural Strut, Butterfly, Baton, Articulated Rim and Rim Grafts
- » Lateral Crural Flip Over Graft
- » Dorsal Augmentation with Rib Graft/Diced Cartilage Fascia Graft
- » Medial Oblique, Intermediate, Lateral and Transverse Osteotomies
- » Silicone Chin Implant
- » Dorsal Augmentation with Diced Cartilage

Program is subject to change without prior notice.
