Under the auspices of:

## Welcome Message

Dear Friends & Colleagues,

We would like to invite you to the next edition of our annual event '11 Days of Facial Plastic Surgery'. The second course during this event will be the '6<sup>th</sup> Singapore Facial Rejuvenation Surgery Fresh Frozen Cadaveric Dissection Course', which will be held from 22<sup>nd</sup> to 24<sup>th</sup> February 2023.

The course comprises of one day of lectures and 2 days of dissection on high quality fresh frozen cadaveric specimens to provide extensive hands-on training in a wide range of surgical techniques used to rejuvenate the aging face and enhance facial beauty. Practical tips by our expert faculty will help delegates to enhance their skills in pre-operative assessment, planning, surgical techniques, and post-operative care of patients seeking surgical facial rejuvenation.

The laboratory portion of the course will be limited to 26 Dissectors to allow for close supervision by our experienced faculty. Participants in the previous courses have greatly appreciated the ample time available for dissection, which allowed them to learn the surgical techniques in-depth, and at a relaxed pace. Surgical instruments, endoscopes, monitors and implants will be made available to the delegates.

The participants will benefit from the wealth of experience offered by our outstanding regional and national multidisciplinary faculty belonging to the field of Otolaryngology, Plastic Surgery, Ophthalmology and Maxillofacial Surgery.

Singapore is a vibrant city with many historical and contemporary architectural landmarks. Singapore is a popular tourist destination that offers richness and variety of experiences that will help you to have a memorable stay in this garden city. Travel to Singapore is easy as it is well connected to major airports in the world.

We look forward to seeing you at '11 Days of Facial Plastic Surgery 2023'.
