Under the auspices of:

Welcome Message

Dear Friends & Colleagues,

We would like to invite you to the 2023 edition of our annual event '11 Days of Facial Plastic Surgery'. The third course during this event will be the '6th Singapore Facial Fracture, Orthognathic Surgery and Soft Tissue Reconstruction Fresh Frozen Cadaveric Dissection Course', which will be held from 25th to 28th February 2023.

The course consists of one and a half days of didactic lectures covering the commonly encountered problems during facial reconstruction. The participants will be imparted comprehensive practical training in management of all aspects of facial fractures (using AOCMF principles) and soft tissue defects. This year the course has been enhanced further with the addition of a substantial section on Orthognathic Surgery. The surgical skills laboratory portion of the course will be limited to 26 Dissectors to allow for close and personal interaction between the faculty and the participants. Participants in the previous courses have greatly valued the generous amount of time available for dissection during the course. State of the art surgical instruments and implants will be made available to the delegates courtesy of our sponsors Johnson and Johnson and Karl Storz.

The participants will also benefit from the wealth of experience offered by our outstanding regional and national multidisciplinary faculty belonging to the field of Otolaryngology, Ophthalmology and Maxillofacial Surgery.

Singapore is a vibrant city and a popular tourist destination. It offers a variety of experiences that will make your visit to our lion city memorable. Travel to Singapore is easy as it is well connected to major airports in the world.

We look forward to seeing you at '11 Days of Facial Plastic Surgery 2023'.

Dr Sandeep Uppal

PhD, FRCS (ORL-HNS), FAMS (ORL)
Course Director
Head of Department and Senior Consultant
Head of Facial Plastic, Reconstructive and
Aesthetic Service
Department of Otolaryngology,
Head and Neck Surgery
Khoo Teck Puat Hospital, Singapore

Dr Amanda Tan

MBBS, MMed (ENT), FAMS (ORL)
Course Coordinator
Consultant Otolaryngologist trained in
Facial Plastic Surgery
Department of Otolaryngology,
Head and Neck Surgery
Khoo Teck Puat Hospital, Singapore

Programme at a Glance

Day 1 & 2 Lectures

- » Assessment and Initial Management of Patients with Facial Injury
- » Craniofacial Anatomy and Biomechanics
- » Principles of Osteosynthesis and Choice of Plates and Screws
- » Management of Dentoalveolar Injuries
- » Assessment of Patients with Malocclusion
- » Assessment of Facial Asymmetry
- » Principles of Orthodontic Treatments
- » Frontal Sinus Fracture Management
- » Planning for orthognathic surgery
- » Naso-Orbito-Ethmoidal Fracture Management
- » Management of Zygomatico-Maxillary Complex Fractures
- » Management of Orbital Wall Fractures
- » Management of Le Fort Fractures
- » Management of Condylar and Subcondylar Fractures
- » Management of Mandible Angle and Body Fractures
- » Management of Mandible Symphyseal and Parasymphyseal Fracture
- » Sequencing of Panfacial Fractures
- » Subunit Approach to Facial Reconstruction
- » Management of Eye Lid Lacerations and Canalicular Injuries
- » Local Flaps in Facial Reconstruction
- » Principles of Facial Scar Revision
- » Nasal Reconstruction
- » Lip and Perioral Reconstruction
- » Ear Reconstruction
- » Scalp Reconstruction
- » Reconstruction of Eyelid Defects

Day 2 to 4 Fresh Frozen Cadaveric Dissection

- » Z-plasty and Geometric Broken Line Closure for Scar Revision
- » Ear Reconstruction
- » Eyelid Reconstruction
- » Abbe Estlander Flap
- » Karapandzic Flap
- » Nasal Defect Repair: Bilobed Flap
- » Alar Defect Repair: Subcutaneous Pedicle Interpolated Cheek Flap and Conchal Cartilage Graft
- » Paramedian Forehead Flap
- » Coronal Approach to Zygomatic Arch and Frontal Sinus Fractures
- » Preauricular, Retromandibular and Transcervical Approaches to the Mandible
- » Transoral Approaches to the Midface and Mandible
- » Maxillo-Mandibular Fixation
- » Transconjunctival and Subciliary Approaches to the Orbit and Midface
- » Introduction to DePuy Synthes Matrix Sets
- » Creating a Le Fort 1 Fracture and Repairing It
- » Creating and Repairing Tripod and Orbital Floor Fractures
- » Creating a Parasymphyseal Fracture and Repairing It
- » Creating a Mandible Angle/Body Fracture and Repairing It
- » Creating a Subcondylar Fracture and Repairing It
- » Creating a Frontal Sinus and NOE Fracture and Repairing It
- » Bilateral Sagittal Split Osteotomy (BSSO)
